0.1.3

2015-08-27

Version History

Date	Version	Comments
2015-08-27	0.1.3	Update UI to allow an organisational entity as a "site": Added new column in list view to show entity type; added icons in list view to indicate organisational parent/root and geographical sites; added checkbox to allow user to flag the new entity as a site; Changed spelling of "organization*" to "organisation*" as UK-based client were fussy with the Americanization of the spelling :)
2015-05-26	0.1.2	Renamed Page titles to "Org. Entitites". Space is liited as page title currently resides on the same horizontal space as the toolbar so "Organization" has to be abbreviated.
2015-05-19	0.1.1	Removed Config Screen illustration showing "Organizational Entities" button, as Renée doesn't feel the "Organizational Entities" screens should be accessed from there. Currently entry point to "Organizational Entities" from within application is yet to be confirmed. Updated the list view to show entries using a expandable/collapsible tree view.
2015-05-18	0.1	Initial Version
